

Nashville Tele Pickup Compatibility

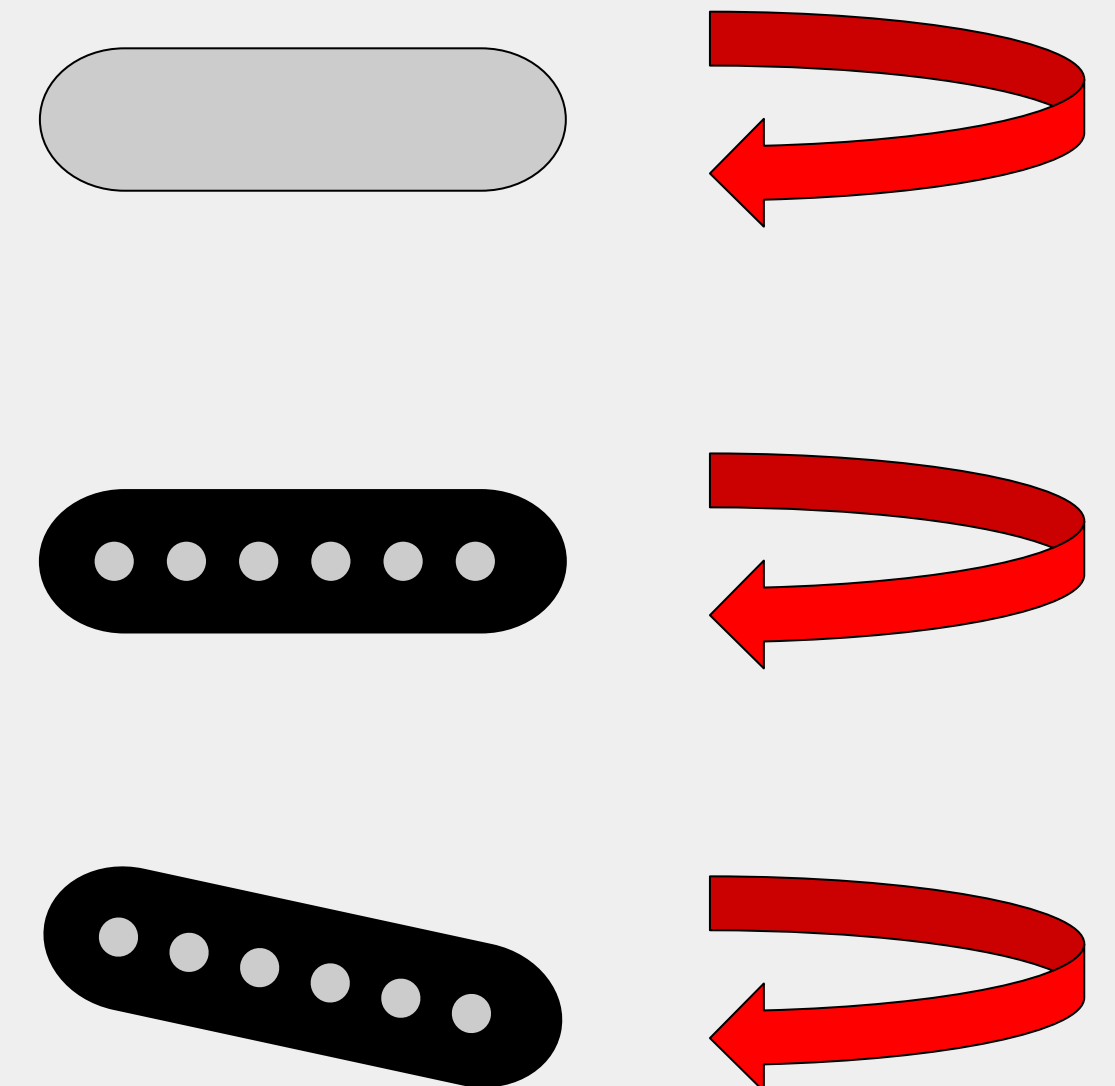

Stock Fender
Nashville Tele

Seymour Duncan
Brad Paisley La Brea

Seymour Duncan La Brea
w/ Stock Fender Tele
middle

Seymour Duncan pickups are wound in the opposite direction as the Fender Nashville neck and bridge pickups. Replacing a standard Tele pickup set with these is fine because everything is reversed.

Putting Seymour Duncan La Brea pickups in the Nashville set means that the stock middle pickup is opposite what it should be in relation to the La Brea's.

Flipping the wires on the middle pickup solves this problem of positions 2 and 4 being out of phase (thin sounding).

Thanks to Zac Childs, Brad Paisley's former guitar tech, for helping me figure this out. :)
